**7770 E. Iliff Avenue, Unit “G” Denver, Colorado**

**Registration and networking 7:30 a.m. Session will Begin at 8:00 a.m.**

\*\*\*\*\*

Since the beginning of 2007 HSAC contract instructors have been delivering the ICS Forms, Plans and Checklist workshop with great success. Participants have ranged from military installation commanders to public health leaders and some of the most progressive first responder leaders from Colorado's largest municipalities. This workshop allows participants to work through a single custom all hazards scenario, which is based on the official DHS national planning scenarios. The workshop immerses the participants in the process of using, communicating and understanding the ICS forms, plans and, position checklists. This workshop is based on and builds on the concepts of NIMS and the new all hazard curriculum and ***is instructed by state certified type III all hazard personnel that hold roster positions on formalized incident management teams.*** Although referred to as a workshop, the day is focused on the concepts of scenario based training as a building block to handling real world events. The Forms workshop in addition to using the 15 National Planning Scenarios from the Department of Homeland Security also ties directly to the Target Capabilities List and the Universal Task List. Lastly, the workshop in 2008 now features a computerized interactive classroom trainer component and custom scenario table for the most advanced student learning.

***This course has been approved by Colorado P.O.S.T. ( #HS0010)***
